Madison College strives to be a place where not only students, but employees feel they are welcomed and can succeed. That effort has been recognized: **Madison College won the Best Perks & Benefits and the Best Compensation awards** from the 2023 Comparably Best Place to Work Awards competition.

What is Comparably?

Comparably is a website that showcases a fair and accurate employer brand by getting reviews from verified and current employees. Unlike Yelp or Indeed, where reviews can be from anyone, employee or not, Comparably reviews are only from certified current employees. This ensures accurate and current reviews of the organization.

How did we get nominated?

We asked employees from across the college to fill out an anonymous review for the site about work life balance, benefits, community and more. Once the Madison College page had more than 100 current employee reviews, it was added to the "large organization" pool to qualify for awards. We competed against companies like Uber, Microsoft, and Google. Out of roughly 70,000 companies on Comparably that strive to win an award, only the top 100 win in each category.

Thank you to all employees who took the time to share a review! We can now proudly display these badges on our Career pages of the website, Facebook, LinkedIn, and Instagram.
