On Wednesday, October 4, Madison College kicked off October Manufacturing Month with the first of three events to be hosted with the second annual Skilled Trades Showcase at the Portage Enterprise Center.

The event welcomed local high school students to learn more about some of the Trades and Technology programs offered by the college, including Welding, Machine Tool, Metal Fabrication, Cabinetry & Millwork, Agriculture Equipment Technology, Diesel Equipment and Electro-Mechanical Technology. Students also attended sessions on registered and youth apprenticeships and Early College, dual credit and applying to Madison College. Employers from local manufactures were on hand to meet with students and talk about opportunities at their respective companies. In the evening, there was a community-wide open house that provided an opportunity to see all that the college has to offer.

Learn more in the recent article from [Portage Daily Register](#).

There will be two additional manufacturing open house/job fair events this month:

- Fort Atkinson on Tuesday, Oct. 17 from 4-7 pm
- Truax Campus on Tuesday, Oct. 24 from 4-7 pm
